

Accessing BeachNet+ Wireless with Windows 10

The following instructions describe how to use Windows 10 to connect to BeachNet+ and designate BeachNet+ as your default SSID (wireless network).

NOTE: To connect to BeachNet+, you must have a valid nine digit CampusID and your BeachID password. If you have not activated your BeachID password, visit <https://beachid.csulb.edu/>. Also note that you will need to update your password on your mobile device whenever you update your BeachID password.

Connect to BeachNet+

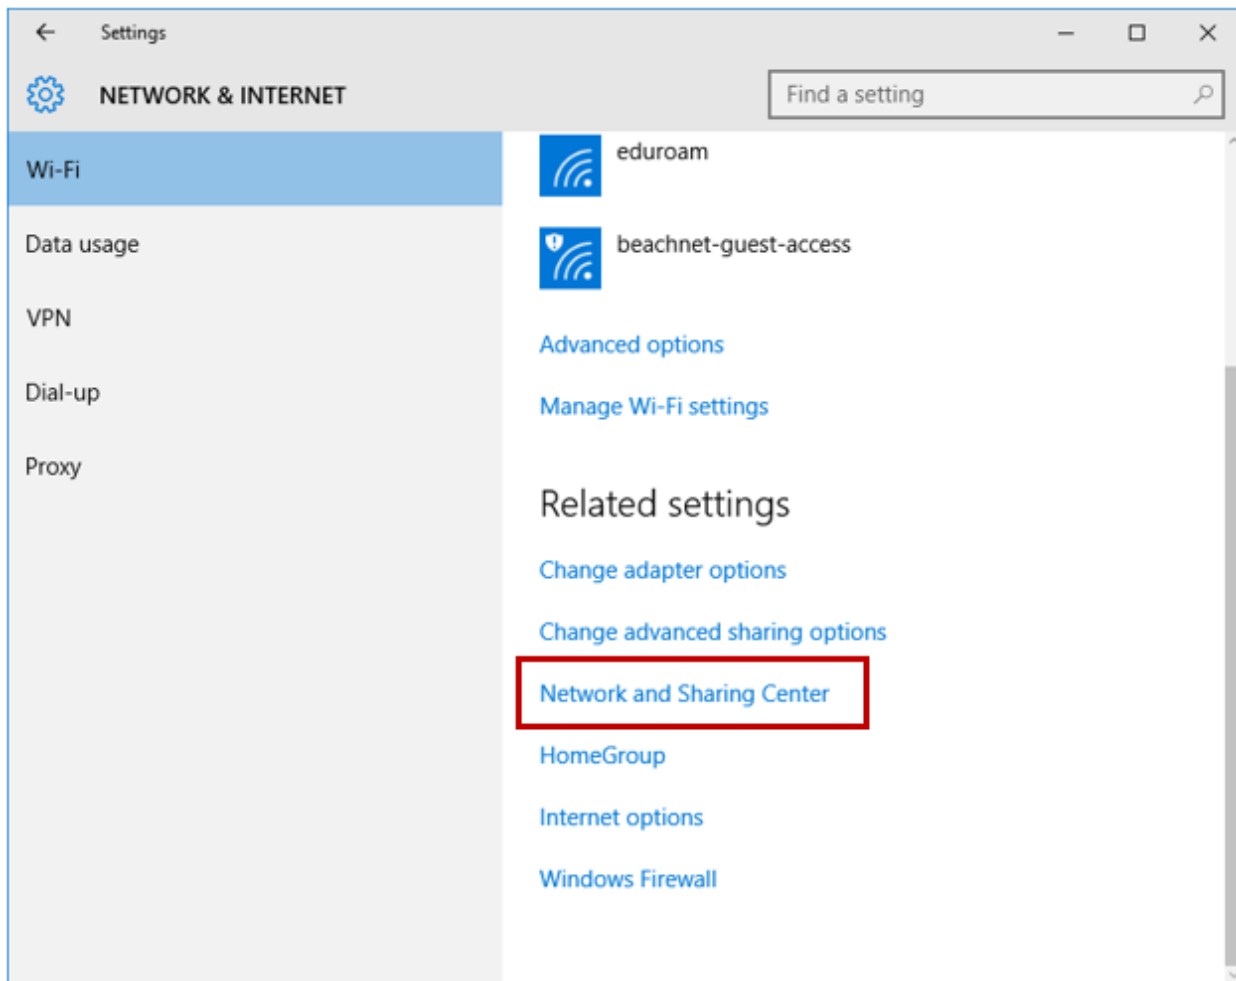

1. Click the Wireless icon in system tray.

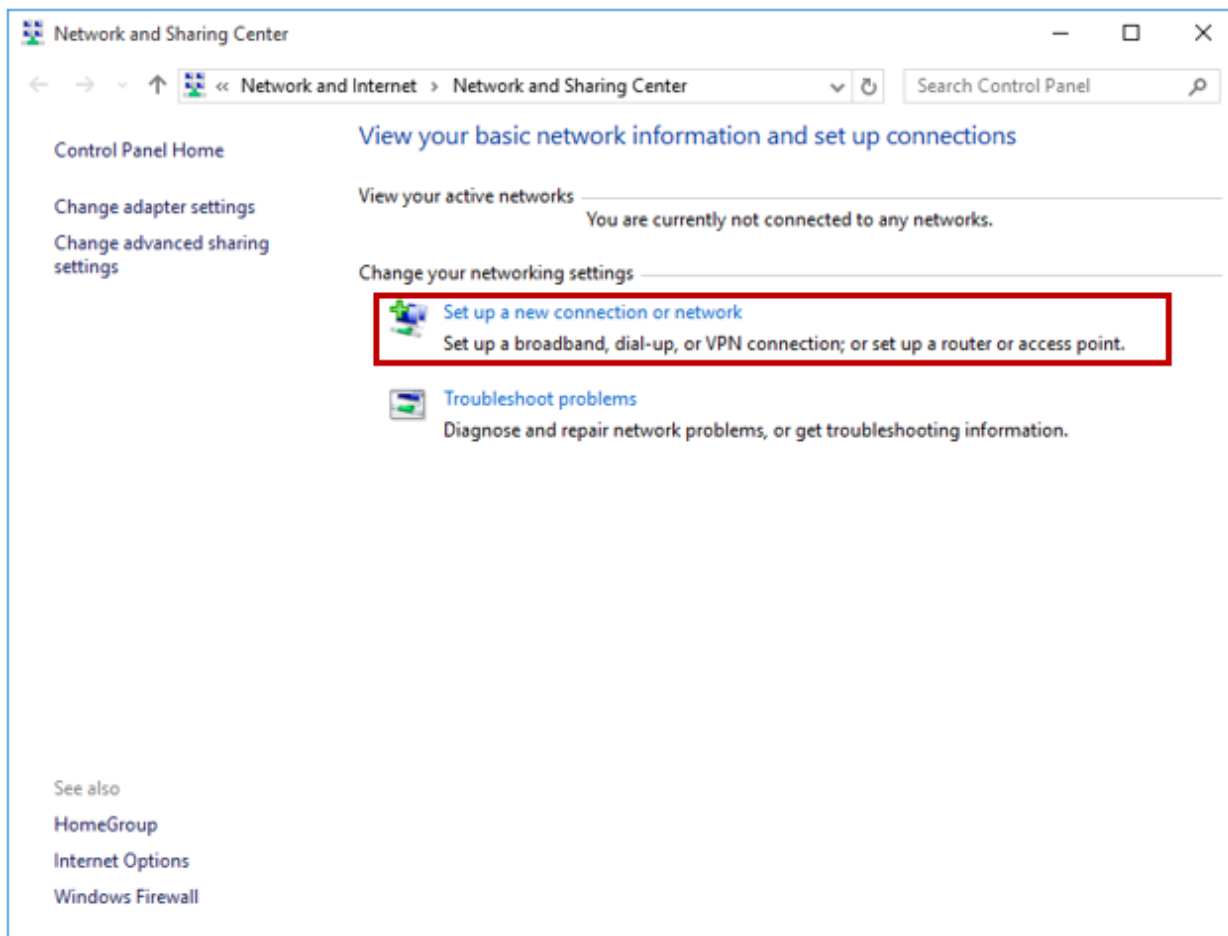

2. Click **Network settings**.

3. Click **Network and Sharing Center**.

4. Click "Set up a new connection or network".

5. Click "**Manually connect to a wireless network**" and **Next**.

6. In the Network name field enter "**beachnet+**", in the Security type dropdown, select "**WPA2-Enterprise**" and click "**Next.**"

←  Manually connect to a wireless network

Enter information for the wireless network you want to add

Network name:

Security type: ▼

Encryption type: ▼

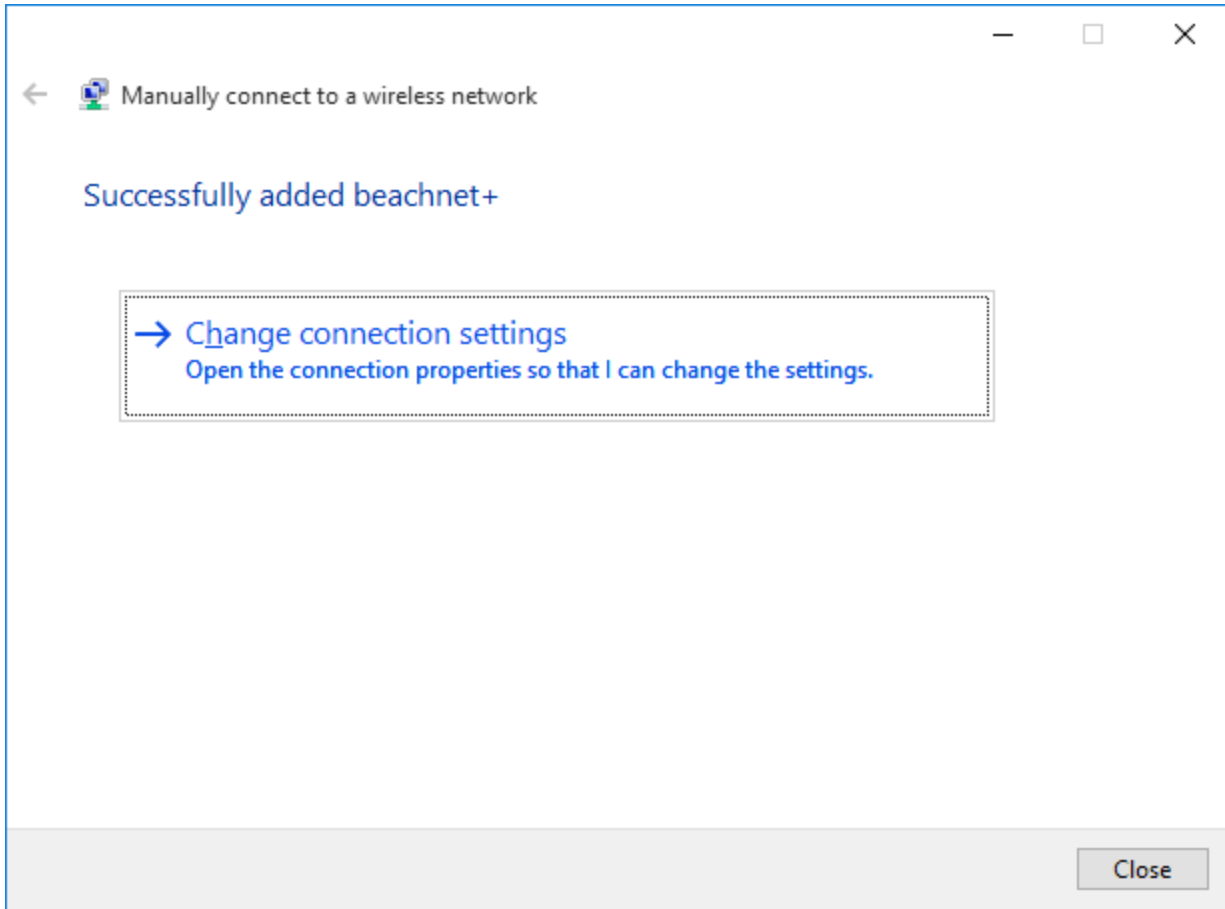

Security Key: Hide characters

Start this connection automatically

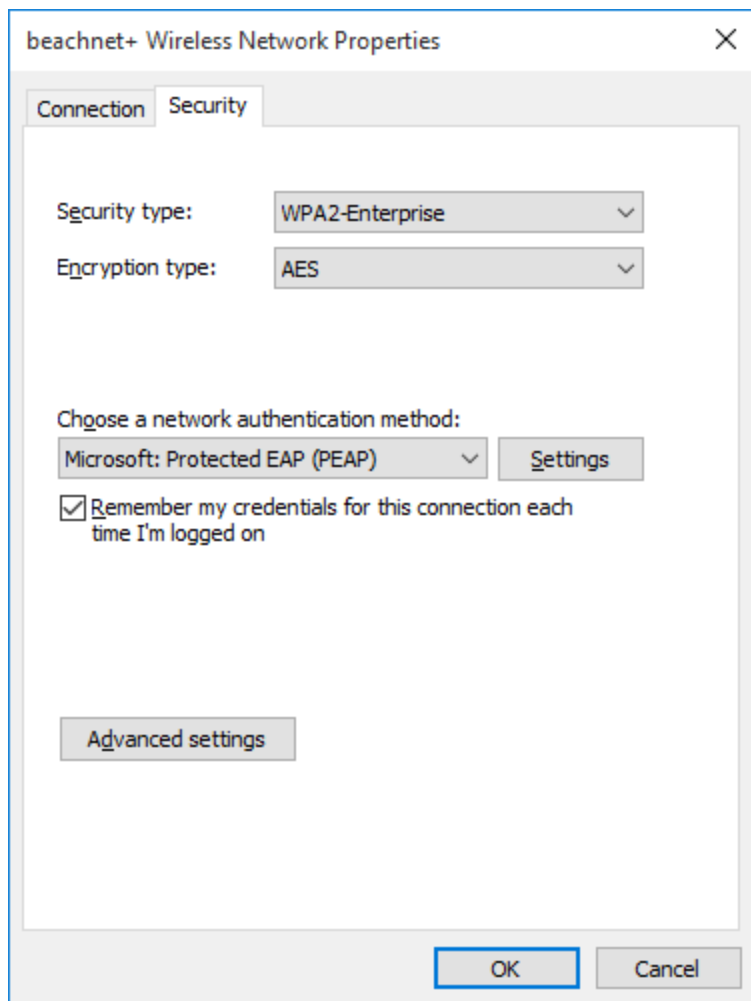

Connect even if the network is not broadcasting

Warning: If you select this option, your computer's privacy might be at risk.

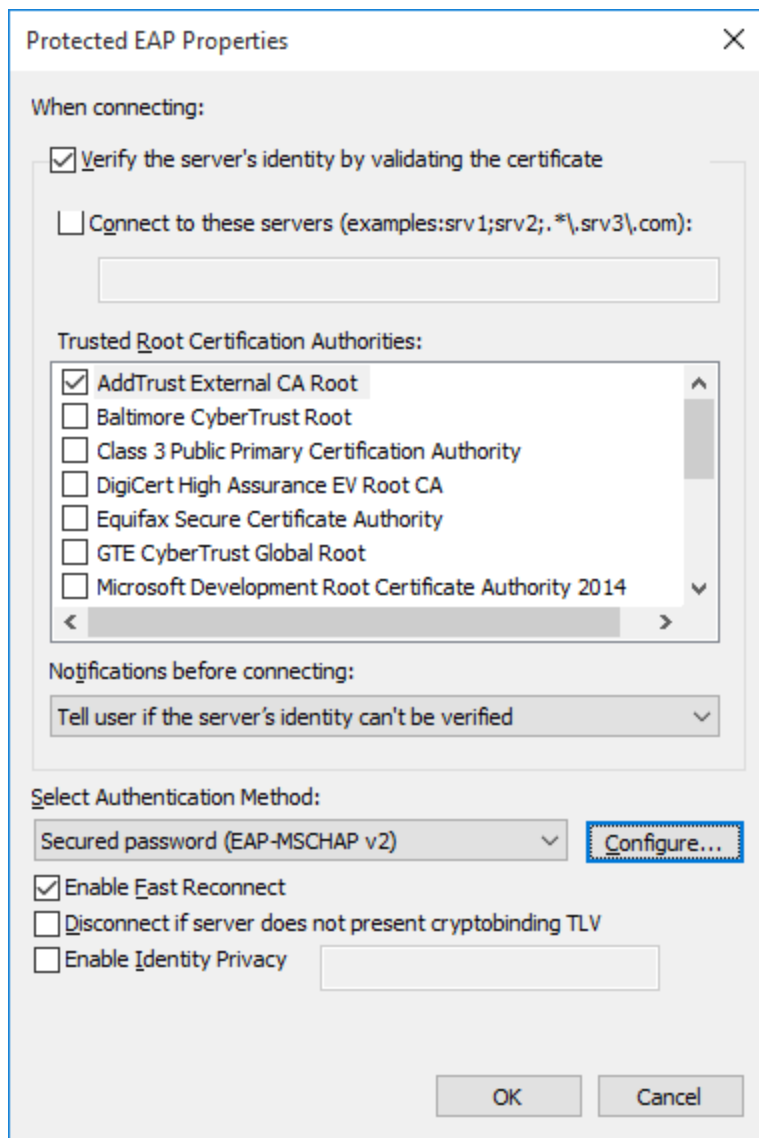

7. Click "Change connection settings".

8. Click on the Security tab and click "**Settings**".

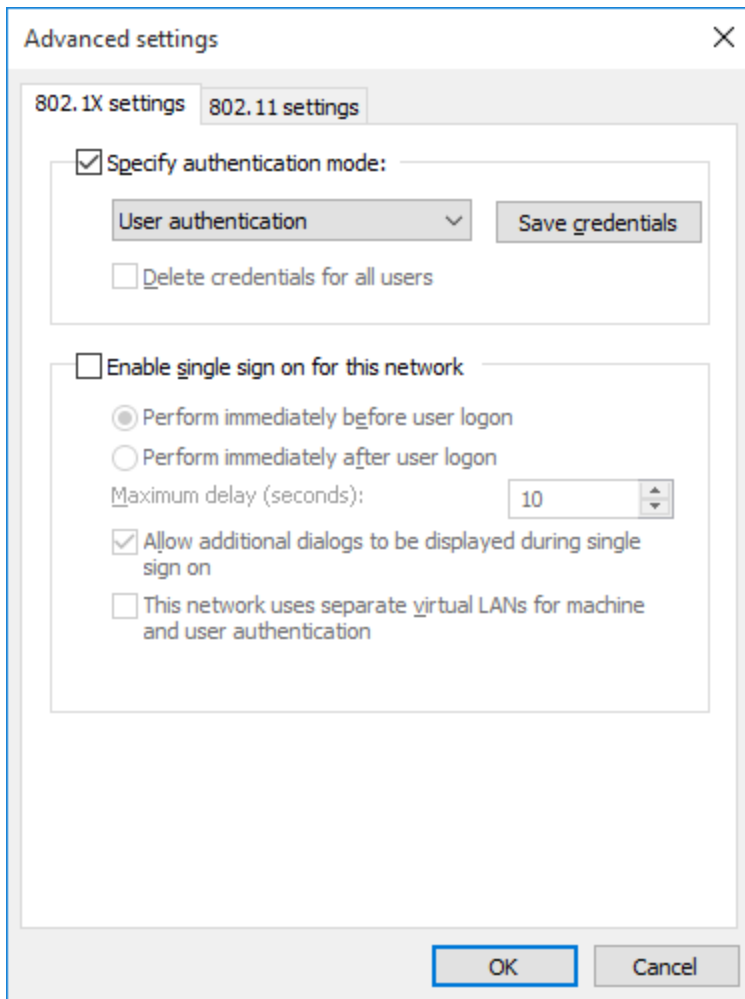

9. Check box next to "AddTrust External CA Root" and click "Configure".

10. Confirm "Automatically use my Windows logon name and password" is *not* checked and click **OK** and **OK** again.

11. Click "**Advanced Settings**" and check box next to "**Specify authentication mode:**" select "**User Authentication**" and click **OK** and **OK** again . Click Close to save new beachnet+ profile.

12. After closing last window, Windows will prompt for username and password.

13. Connect to beachnet+ wireless by clicking the wireless icon and selecting "beachnet+" from the list of available networks.

14. If you are prompted to Terminate or Connect, examine the certificate details for the Radius Server names "its-clear01.campus.ad.csulb.edu" or "its-clear02.campus.ad.csulb.edu" or "its-wifiath01.campus.ad.csulb.edu" and is signed by AddTrust External CA Root or InCommons CA. Then click Connect.
